About Excel Latin America Bond Fund II

The Fund's investment objectives are to provide unitholders with (i) monthly distributions; and (ii) the opportunity for capital appreciation, in each case, by investing in a diversified portfolio (the "Portfolio") consisting primarily of U.S. dollar denominated high yield fixed income securities issued by companies located in Latin America. The Fund hedges substantially all of the value of the Portfolio attributable to the Class A units and the Class F units, to the Canadian dollar. The Portfolio is not hedged in respect of the Class U units. The Fund does not have a fixed monthly distribution amount but intends to, at least annually, set distribution targets based on the Manager's and portfolio manager's estimate of distributable cash flow for the period; all distributions are paid out to unitholders as cash distributions.

Class A units of the Fund trade on the Toronto Stock Exchange under the symbol ELB.UN.
